

BUSINESS ON THE BOOKS ANALYSIS – FY2027

YEAR-TO-DATE REVENUE SUMMARY

The 2026/27 financial year continues to reflect positive demand compared with the same time last year. Confirmed revenue is currently pacing R13m, or 19%, ahead of STLY (Same Time Last Year).

Foundation Phase – Q1 2026: **+33.7% vs STLY**

Q1 reflects a healthy recovery, with confirmed revenue reaching R18.1m—R4.6m ahead of STLY.

March exceeded budget by R224k. Although April performed strongly, it closed R739k below budget, while May remained slightly behind STLY. Overall, the quarter ended R3.1m below budget.

Peak Season – Q2 2026: **+19.7% vs STLY**

Q2 shows strong year-on-year growth, with confirmed revenue reaching R37.4m compared with R31.3m STLY—an improvement of R6.1m.

Including R2.1m in provisional bookings, the total Q2 pipeline stands at R39m, which is 26% ahead of STLY.

However, this remains the most critical performance gap of the year, as Q2 is the primary revenue driver. Confirmed revenue is R12.2m below budget, reducing to R10.2m when provisional bookings are included.

Shoulder Season Pipeline: **-13% vs STLY**

Confirmed Q3 revenue currently stands at R11.1m, which is R1.7m, or 13%, behind STLY.

However, the total pipeline increases to R15m when R3.9m in provisional bookings is included. This places Q3 R2.7m, or 21%, ahead of STLY and indicates encouraging demand recovery across the traditionally softer months.

Festive and Early-Year Pace – Q4 2026: **+31% vs STLY**

Q4 continues to show strong forward momentum, with confirmed revenue of R16.9m compared with R12.9m STLY—an increase of R4m.

Including R1.6m in provisional bookings, the total Q4 pipeline reaches R18.6m.

Key Takeaways

Demand remains ahead of STLY, with particularly strong confirmed growth in Q1, Q2 and Q4.

Q3's confirmed position requires attention, although its provisional pipeline provides meaningful upside.

The conversion of provisional bookings—particularly across Q3 and Q4—remains critical.

Despite the positive year-on-year position, the total pipeline remains R32m below the full-year budget, making conversion, yield optimisation and late-booking demand essential.

DISTRIBUTION, RESERVATIONS AND REVENUE UPDATE - HELENE

KEY ACHIEVEMENTS

RESERVATIONS SYNOPSIS – HELENE

- The business continues to experience shorter booking lead times, with an increase in last-minute enquiries and confirmations, particularly for near-term travel periods. Forward bookings remain more cautious, with guests delaying confirmation and preferring flexible travel planning, creating a softer long-lead pipeline. However, ongoing short-lead demand is expected to support performance. Despite third-party listings and API developments, the majority of bookings continue to come through travel agents, tour operators, and DMCs. Peak periods continue to sell out, resulting in substantial lost business when requested dates are unavailable and guests are unwilling to shift travel dates. We also turned away a few strict Kosher last-minute bookings where there was insufficient opportunity to prepare and deliver the guest experience at our expected level.

OPERATIONAL STRENGTHS & ENGAGEMENT

- **Personalised Engagement:** Commercial Manager & Sales Manager are copied on all new reservations, to conduct personal follow-ups. This has significantly improved conversion rates, enabled recognition of high-value bookings and strengthened relationships with new agents & we are well positioned to maintain momentum and support budget expectations..
- **Booking Channels:** Although listed on third-party websites and developing API integrations, most bookings originate via email or phone calls from travel agents, tour operators and DMCs. We are engaging with more marketing campaigns on leisure consortia. Despite being listed on the Global Distribution System, we expect that this will continue to be used for checking availability and raising awareness and the bookings will continue to be made via email due to the complexity of a villa booking.

2026/27 SEASON ANALYSIS

- **High-Demand Capacity Constraints:** Prime peak periods are consistently fully booked, resulting in significant lost business as we cannot accommodate guest requests for these specific dates.
- **Adjacent Date Challenge:** Despite high-demand dates selling out, shoulder periods around these peaks remain under booked. Offers for alternative dates are consistently declined, as guests exhibit strong inflexibility outside their requested high-demand windows.
- **More flexibility in Green Season:** Rates have been contracted from 4 guests in Mvula/ Karula villas in the green season; however, we now require 6 paying guests to qualify for the Pay3Stay4 offer. We have also added further value to Mapogo stays, where a Pay3Stay4 offer is also available when booking for 8 guests.

2026/27 BOOKING TRENDS & MARKET CHALLENGES

- **Demand Growth & Partner Momentum:** For the 2026/27 period, both provisional and confirmed pickups are showing a significant increase.
- **Shifting Guest Dynamics:** Increased preference for couples makes booking entire villas less financially viable for many, impacting occupancy.

TOP PRODUCING TRAVEL INBOUND PARTNERS *confirmed bookings as per 31/07/2026

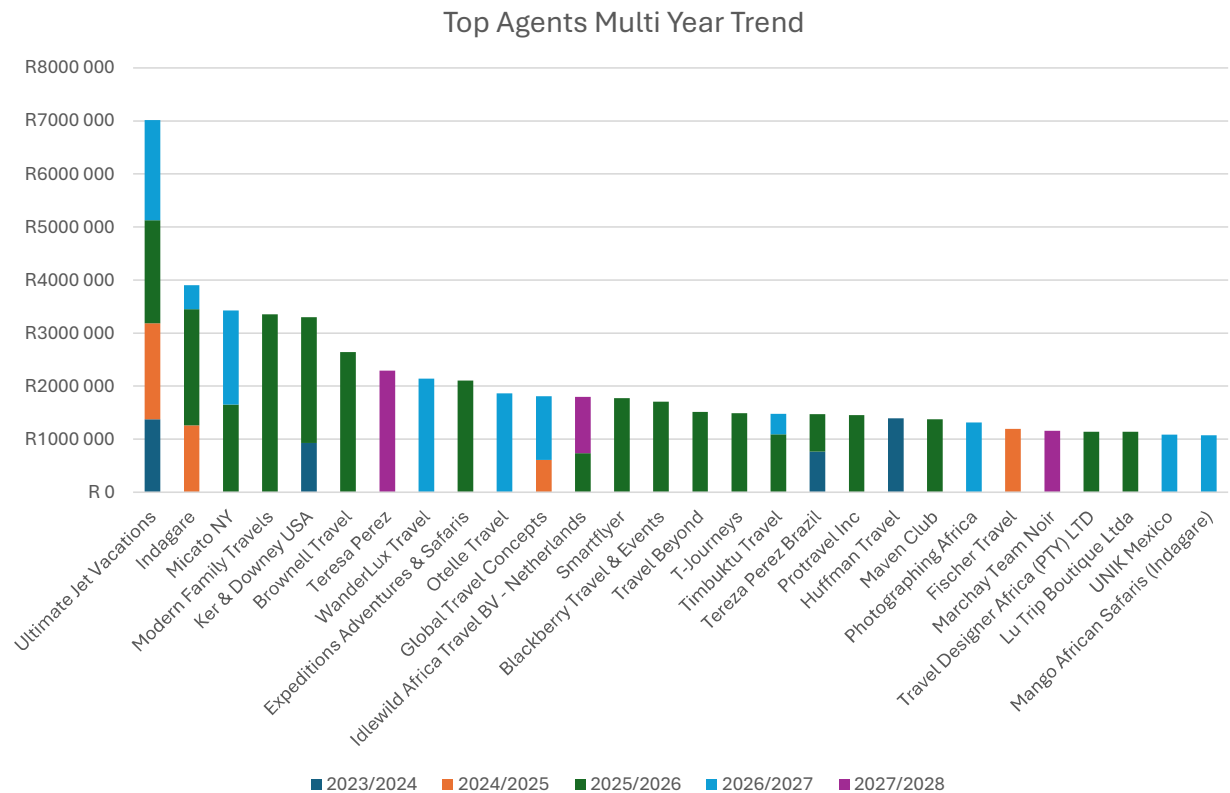

Data shows cumulative support since March 2023, including annual support.

Clear evidence of new supporters in FY2026 and into FY2027 as we move into a higher rate range is shown while past supporters continue to book.

We are seeing good returns in key partners such as Micato, And Beyond, Giltedge, Ker & Downey, Wilderness and Tour D’Afrique after significant investment in these relationships.

TOP PRODUCING INTERNATIONAL OUTBOUND AGENTS *confirmed bookings as per 31/07/2026

Data shows cumulative support since March 2023, including annual support.

Clear evidence of new supporters in FY2026 and into FY2027 as we move into a higher rate range is shown while past supporters continue to book.

We are seeing good returns from the UJV fam trips with their booking agents as well as marketing efforts with Indagare. Escape Safari Company book for Modern Family Travels and also visited us on a fam trip recently. 2025/6 was very strong for Brazilian bookers and is now being overshadowed by Mexican partners.
